Education

Peking University – School of EECS **Turing Class** Sep 2024 – Jun 2028 (expected)

GPA: 3.90 / 4.00, Rank: 7/460

Shanghai High School Sep 2021 – Jun 2024

Publication

- CQDC-Warp: GPU-Accelerated Differentiable Quasi-Dynamic Simulation for Contact-Rich Manipulation. *Under review.*
  Yanchen Ding*, Jiayi Chen*, Jianfeng Xu, Wei Zhao, Li Yi, He Wang.

Research Experience

- Advised by **Jiayi Chen** (Ph.D. candidate advised by **Prof. He Wang**). Sep 2025 – present
  I worked on trajectory optimization for contact-rich manipulation, aiming to use simulation and mathematical optimization to generate high-quality, low-cost data for downstream robot training.
- Advised by **Yuxing Chen** (Ph.D. candidate advised by **Prof. He Wang**). Sep 2026 – present
  I plan to work on soft-body simulations to build digital twins and generate training data for deformable-object manipulation.

Awards and Honors

- John Hopcroft Scholarship. 2026
- Third Prize, Peking University Collegiate Programming Contest. 2026
- John Hopcroft Scholarship. 2025
- 9th Place, 2025 Intelligent Computing Network Challenge. 2025
- Silver Medal, Chinese Mathematical Olympiad. 2023
- First Prize, National High School Mathematics League (Shanghai Division). 2023

Selected Coursework

- Mathematical Analysis II: 96 / 100
- Advanced Algebra II: 94 / 100
- Introduction to Artificial Intelligence: 99 / 100
- Introduction to Computer Systems: 94 / 100
- Discrete Mathematics and Structures: 99 / 100
- Introduction to the Theory of Computation: 93 / 100
- Physics Simulation for Computer Graphics：99 / 100
